

## BOE Useless in Swine Flu Scare!

Phone calls to several schools and the BOE requesting information about the Montgomery County School system's plans to deal with swine flu resulted in a big "I don't know" from school officials. Local schools said they "no direction from Hungerford Rd." regarding the swine flu and had no idea what, if any, plan was available to deal with the rising flu scare.

Despite huge sums of money given to Jerry Weast and his self promotion army, nothing has been done to prepare for a severe flu epidemic. Another example of the waste of tax payer money on Jerry Weast and the Board of Education.
